**DARFUR PEACE AND
ACCOUNTABILITY ACT OF 2006**

SPEECH OF

HON. TIM RYAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 5, 2006

Mr. RYAN of Ohio. Mr. Speaker, I rise today to praise the passage of H.R. 3127, The Darfur Peace and Accountability Act of 2006. As I was regrettably absent at the time of this vote, I now take the opportunity to affirm my resolute support of this act.

"The care of human life and happiness, and not their destruction, is the first and only object of good government." These words, spoken by Thomas Jefferson, come to mind as I consider the current situation in Darfur, Sudan. In a conflict that has killed hundreds of thousands of people, displaced and left millions hungry, the United States can remain idle no longer. I stand with my colleagues in the House in support of the Darfur Peace and Accountability Act and would have voted for the resolution if I had been present.

**INTRODUCTION OF THE
SCHOLARSHIP DATABASE ACT**

HON. RUSH D. HOLT

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 6, 2006

Mr. HOLT. Mr. Speaker, today I introduce the Scholarship Database Act to create a one-stop Web portal of scholarships, grants, fellowships, and other forms of financial aid for the students wishing to study science, technology, engineering, or mathematics disciplines.

Yes, there are many websites in existence that inform students about federal financial aid or students pay for a service to locate other scholarship opportunities. However, none seems to meet the needs of a wide range of students across the country. We grapple with what to do for our nation's future in terms of the science, technology, engineering, and mathematics students, the least we can do is ease the burden of finding financial aid. In a time of fiscal responsibility, this is an affordable way to enable our workforce of tomorrow to be highly skilled and well educated.

The Science, Technology, Engineering, and Mathematics (STEM) Scholarship Database would give a complete list of scholarships, fellowships, and other programs of financial assistance from all public and private sources for science, technology, engineering, and mathematics postsecondary and post-graduate level study.

First generation students would greatly benefit from such a database that would separate the information according to disciplines of study, level of study, and assistance based on gender, ethnicity, or other characteristics.

When one is the first person in your family to consider going to college one often has very little guidance on how to proceed with the entire college application process, of which financial aid is one piece. If a student does not immediately or easily find financial assistance they may at first see their dream of a college degree in a STEM field shattered. We can ease this with the one-stop Web portal of STEM financial aid.

As we move forward, this Web portal can expand to meet the needs of our nation, and it can serve as a model for other disciplines to follow suit.

**IN HONOR OF CALIFORNIA'S COUNTY
AGRICULTURAL COMMISSIONERS**

HON. JIM COSTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 6, 2006

Mr. COSTA. Mr. Speaker, I rise today to honor California's County Agricultural Commissioners. Agriculture is California's No. 1 industry. In 2004 the fertile soils of California supported over 350 different crops, which were valued at over \$37.5 billion and shipped throughout the United States and foreign countries. Weather, water and good farmers are some of the major factors contributing to California's bountiful crops. One other prime factor in California's agricultural success has been the presence of California Agricultural Commissioners.

California County Agricultural Commissioners will celebrate their first 125 years during their annual convention in May 2006, in San Luis Obispo, CA. No other State in the United States has the Agricultural Commissioners system, which has been in existence in California since 1881. It is fitting that the California Agricultural Commissioners be recognized and honored for their contributions to the well being of California and to our Nation.

As prescribed by State Law, the County Agricultural Commissioner is responsible for the local administration of State wide enforcement programs that promote and protect the agricultural industry of the State. In addition this commission is dedicated to protecting public health, safety and welfare. In fulfilling this responsibility, the primary objective of the County Agricultural Commissioner is to maintain a viable system of production and delivery of an abundant supply of wholesome food and fiber to domestic and export consumers. Each agricultural commissioner adheres to the following policies in order to maintain the integrity of the County Agricultural Commissioner's Office.

The first and foremost policy is to ensure the protection of California's agricultural resources and the environment in manner that will result in the greatest long-term benefit to all. One of the primary ways the commission protects agricultural resources, the environment and public health is by supporting beneficial legislation as well as preserving local determination. The Commissioner seeks to insure that all interagency and joint policies provide adequate flexibility to accommodate local concerns and resources.

The County Agricultural Commissioner recognizes the need to protect the agriculture industry from the introduction and spread of

damaging pests. Therefore, it encourages and promotes the suppression of pests through biological, cultural, mechanical and chemical methods. However, the Commissioner has always been cognizant of the effects of harmful pesticides and has adamantly enforced all laws and regulations that provide for the appropriate, safe and efficient use of pesticides.

The Commissioner protects both businesses and consumers. The consumers are protected from fraud and deception and are assured marketing equity among producers and among shippers in the distribution of fruits, nuts, vegetables, eggs and honey by the uniform enforcement of quality standards. The Commissioner's Office also encourages the development of alternate disposal methods for substandard commodities to prevent waste.

The Agricultural Commissioners are today enforcing legislation of the basic quarantine sections that have stood for over 115 years. It has been the enforcement of these quarantine laws that has helped to keep California agriculture free from biological pollution caused by invasive insect and plant diseases found in other parts of the world.

The work of the Agricultural Commissioners is to be commended as their presence, dedication, knowledge, professionalism and hard work, has insured an adequate food supply for millions of people and a healthy economy for the State of California. Our Nation's residents as well as citizens of other nations are the beneficiaries of an amazing supply of agricultural products grown throughout the year in California. California, her farmers and Agricultural Commissioners can be proud of the first 125 years of service.

**PAYING TRIBUTE TO LT. COL.
GEORGE SHERMAN (RET.)**

HON. JON C. PORTER

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 6, 2006

Mr. PORTER. Mr. Speaker, I rise today to honor a true American hero, Lt. Col. George Sherman (Ret.) who will be celebrating his 80th birthday on April 17, 2006.

A distinguished member of the Las Vegas community, Lt. Col. George Sherman (Ret.) has dedicated his life to being a loving and devoted husband, father, and grandfather, achieving a brilliant career in the United States Army Air Corp-Air Force, and serving as a respected leader in his community.

In the early 1940's, while serving in the Army Air Corp-Air Force, Lt. Col. George Sherman (Ret.) earned the distinct honor of becoming one of the famed Tuskegee Airmen. Throughout his 22 year service in the United States Military, Lt. Col. George Sherman (Ret.) served as Aircraft Commander, Launch and Control Training Officer, and Chief of Ordnance Safety. Furthermore, while serving, he earned a Bachelor of Science degree in Sociology from the University of Illinois; and after retiring from the military in 1971, Lt. Col. George Sherman (Ret.) received a Masters of Arts in Public Administration.

Over his distinguished life, Lt. Col. George Sherman (Ret.) has shown a passion for aviation and community service. He was awarded the Silver Beaver Award, the highest honor of the Boy Scouts of America; he was a member

of Kappa Alpha Psi Fraternity, an organization that promotes minority brotherhood and leadership; he continues his connection to the Tuskegee Airmen Inc., represented on several occasions in the Las Vegas Sun and Review Journal newspapers; and has held memberships in Negro Aviation International (NAI), the Dadailians, and served on the Board of Directors of the Nevada Black Chamber of Commerce. Today, Lt. Col. George Sherman (Ret.) remains active in the pursuit of minority youth achievement in aviation, while maintaining his commitment of volunteer work within the Clark County community.

Mr. Speaker, it is an honor to recognize Lt. Col. George Sherman on the floor of the House today. I thank him for his services to this country and congratulate him on a wonderful eighty years.

TRIBUTE TO THE HAITIAN EVANGELICAL BAPTIST CHURCH OF MIAMI

HON. KENDRICK B. MEEK

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 6, 2006

Mr. MEEK of Florida. Mr. Speaker, I rise to recognize the Haitian Evangelical Baptist Church of Miami on the occasion of the blessing of its new Sanctuary.

On Sunday, April 9, 2006, the Reverend David Eugene will lead the members of his congregation to celebrate this milestone of the Church, which sits in the heart of my District's North Dade community.

Founded in August 1980, this Church has unselfishly committed its ministry of bringing the message of salvation to newly-arrived Haitian immigrants. Part of its stewardship is an ongoing teaching component and counseling service that helps meet the needs of immigrant families as they strive to adapt to a new culture. It has also defined its outreach effort as to bring the "whole gospel to the whole man," striving to empower the members of its congregation with their spiritual, emotional, mental and relational well-being, and to draw closer to other communities. Consistent with this philosophy of ministry, this Church has embarked on and supported many community projects to improve the quality of life of underprivileged Haitian children in the Miami-Dade community, and in Haiti as well.

Since its establishment 26 years ago, the prime focus of Church members has been the construction of a sanctuary where people of all races and cultural backgrounds can come together to worship. On its appointed hour at 3:30 p.m. on Sunday, this cherished dream will come to fruition when members of this Congregation will join their voices to those of many prominent members and supporters of this community to inaugurate this long-awaited sanctuary and give thanks to all those who have labored long and hard to ensure that this day would come.

Reverend Eugene has spearheaded not only a spiritual rejuvenation of the members of his Church, but he has also made magnificent strides in ensuring that their commitment to the mandate of the Gospel is defined by its outreach efforts to provide free and reduced-price daycare services to the children in the community, along with an after-school pro-

gram for low-income families, dropout prevention, computer literacy and acculturation classes, voters' education and registration. It has also established free student tutorials, substance-abuse prevention counseling, along with counseling for dysfunctional families, parenting skills, and regular seminars on cultural diversity.

I am confident that this Church will continue to serve as an unerring instrument for good by evoking in us the centrality of God in our daily lives, conscious of the fact that mandate of our faith must define our charity, understanding and compassion for those who could least fend for themselves.

With the consecration of its Sanctuary on its 26th year of establishment, the Haitian Evangelical Baptist Church of Miami symbolizes a magnificent legacy for the perseverance and resilience of our Haitian community. I join Reverend Eugene and his congregation in celebrating this historic event. My genuine pride in sharing their friendship is only exceeded by my heartfelt gratitude and admiration for all that they have done to help the people of our community.

INCREASING AWARENESS OF KIDNEY DISEASE IN THE AFRICAN AMERICAN COMMUNITY

HON. WILLIAM J. JEFFERSON

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 6, 2006

Mr. JEFFERSON. Mr. Speaker, as Congress recognizes National Minority Health Month, I join my colleagues, Congresswoman Christensen and Congressman Jefferson to increase awareness about the devastating effects of kidney disease on the African American community.

Both kidney failure and its precursor, Chronic Kidney Disease, CKD, disproportionately affect African Americans. Although only about 13 percent of the U.S. population, African Americans make up 32 percent of the patients treated for kidney failure. The American Heart Association reports that African Americans have a 4.2 times greater rate of kidney failure than white Americans. The Congressional Black Caucus is especially concerned about the growing prevalence of kidney disease because of this disproportionate impact.

Mr. Speaker, the leading causes of kidney disease are diabetes and high blood pressure, both of which also disproportionately affect African Americans. Diabetes occurs at twice the rate in the African American community than it does with Caucasians. High blood pressure affects 1 out of every 3 African American adults. According to the American Heart Association, the prevalence of hypertension in the African American community is among the highest in the world.

Mr. Speaker, African Americans are four times more likely to develop kidney failure than Caucasians. African Americans make up 12 percent of the population but account for 30 percent of people with kidney failure. Diabetes and high blood pressure account for about 70 percent of kidney failure in African Americans. A recent National Kidney Disease Education Program, NKDEP, survey of African Americans found that only 17 percent named kidney disease as a consequence of diabetes,

and only eight percent named it as a consequence of high blood pressure. African American males ages 22–44 are 20 times more likely to develop kidney failure due to high blood pressure than Caucasian males in the same age group. Forty-five percent of African American men with kidney failure received late referrals to nephrologists. In some cases people were not aware they had a problem until they needed dialysis.

We must continue our strong support of the efforts of the kidney care community to meet the needs of these patients. We must fund education programs to raise awareness of the disease within the African American community. We must ensure that Medicare treats those who care for patients with kidney disease the same way it treats all other groups of providers—this means enacting an annual update mechanism to recognize inflation and other increases related to caring for these patients. Without equitable reimbursement, it will be difficult for the community to continue to meet the needs of the ever-growing patient population.

Supporting educational programs and high quality care not only improves quality of life for patients, but also reduces the cost to the overburdened Medicare program. Preventing kidney failure and improving care will result in substantial savings for the government. In addition, if treated early, individuals with kidney disease will experience an improved quality of life and be able to maintain more daily life activities, including keeping their jobs.

My colleagues and I applaud the efforts to increase awareness about this important issue and to show support for Americans living with kidney disease. We must act now to help Americans learn more about this deadly disease and how to prevent its development and progression to kidney failure.

TRIBUTE TO THE LATE DAVE PETERSON

HON. DENNIS MOORE

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 6, 2006

Mr. MOORE of Kansas. Mr. Speaker, I rise to pay tribute to the late Dave Peterson, of Overland Park, Kansas, who died on March 20th. Dave was born March 31, 1951, to Harold and Josephine (Lewis) Peterson. He was a lifelong resident of the Kansas City area and married Cindy Peterson, with whom he had two daughters: Erica and Andrea Peterson, all of Overland Park. He is also survived by his sister Pat Higgins and brothers Harold Peterson, Jr., and John Peterson.

Dave Peterson was a member of United Auto Workers Local 31 since he began working at General Motors in 1976. He became the President of the local in 2002, a position he held until the time of his death. He was also the President of the Kansas State CAP Council, the AFL-CIO Tri-County Labor Council, was a past member of the executive board of the Wyandotte County United Way and was involved in numerous charity organizations throughout the community. He formerly served as an executive board member of the Kansas AFL-CIO. Dave worked at the GM-Fairfax facility in Kansas City, Kansas, for 30 years, starting on the production line and then going
